**PATRIOT DATA SOLUTIONS GROUP PRESENTS AT
2009 NIEM NATIONAL TRAINING EVENT
PDSG Subject Matter Experts Present Papers**

July 1, 2009 SAN DIEGO -- Patriot Data Solutions Group, Inc. ("PDSG"), a wholly owned subsidiary of Patriot Scientific Corporation (OTC BB:PTSC), announced today that two papers authored by PDSG employees have been selected for presentation at the 2009 NIEM National Training Event in Baltimore, Maryland in September.

The National Information Exchange Model ("NIEM") was launched in 2005 as a federal, state, local and tribal interagency initiative providing a foundation for seamless information exchange using a common lexicon and an on-line repository of information exchange package documents. It leverages the global data exchange standards efforts and extends the Global Justice XML Data Model (GJXDM) to facilitate timely, secure information sharing across the whole of the justice, public safety, emergency and disaster management, intelligence, and homeland security enterprise. More information may be found at <http://www.niem.gov>.

Summaries of the papers are as follows:

"Business Process Modeling Revisited for IEPD Development and Deployment"

A discussion of the usage of the Business Process Management Notation (BPMN) and the Justice Information Exchange Modeling (JIEM) Tool as orthogonal components for Information Sharing Project Development and Deployment. In addition, a discussion on the relative value for each modeling approach for various project types will take place. The needs of the different project types also demonstrate a need for using multiple tools for capturing all of the relevant information necessary and thereby present the case for being able to share the underlying models between tools and the method by which this interchange can be realized.

"Implementation of NIEM 2.0 for the MIOC Federated Query"

A discussion on how the reuse of the LEX\SAR IEPD was implemented to provide the Michigan Intelligence Operation Center, a standardized view of information gathered through federated query and response services. The use case covers how varying query service data requirements and standards (GJXDM, NCIC, local APIs, etc.) and response formats and content were captured and normalized to generate a single business object repository. The repository provided a mapping for transforming the variations into a common data model to provide the end user a single view of the information.

The NIEM event will be held at the Hilton Baltimore from September 30 to October 2, 2009 and will provide valuable guidance, tools, and resources via concurrent sessions covering subjects of interest to executives, program managers, system architects, and implementers to assist them in their efforts to share mission-critical information. The event will include presentations, best practices, panel discussions and workshops of interest to both government and industry. Papers were sought from practitioners, private sector and educators that support the nationwide implementation and use of NIEM in a variety of domains, including justice, public safety, homeland security, health and human services, maritime, courts, and corrections.

About PDSG

Patriot Data Solutions Group, Inc. (“PDSG”) provides products and solutions that enable mission-critical applications to significantly accelerate the time to value and reduce total cost of ownership for their data-sharing initiatives. The company’s flagship product, the Crossflo DataExchange® solution, helps link systems together and facilitates secure data sharing for any information exchange initiative in the healthcare, public safety and justice markets. The solution has been designed to work directly with a number of national data sharing standards, including HL7 (Health Level 7), NIEM (National Information Exchange Model), and the Global Justice XML Data Model (GJXDM). PDSG’s technological innovation is backed by subject matter expertise and proven methodologies, facilitating the rapid exchange of actionable data in mission-critical applications such as clinical quality improvement and emergency services response management.

PDSG has been working with some of the nation’s earliest and most innovative data exchange projects including one of the most advanced statewide data-sharing initiatives to be deployed in the United States. PDSG is the data-sharing group of Patriot Scientific Corporation, which is headquartered in Carlsbad, California (OTC BB:PTSC). For more information on Patriot Data Solutions Group, visit www.pdsg.com.
