

**Implementing an IJIS Solution?**  
**Let PDSG's Crossflo DataExchange® Help You Manage The Complexity.**

**Proven Technology and People that make a difference.**

## Technology

---

### Standards Based

Our standards-based technology speeds Arrest through Disposition data exchanges between justice agency, case, and offender records management systems.

### Data Transparency

PDSG's **Crossflo DataExchange®** achieves data transparency while adhering to statutory privacy and security requirements, reporting and performance guidelines.

### Data Mapping

Proven Expertise in business process and requirements analysis provides secured case and person data mapping, ensuring that you connect the *Right Data with the Right Person* regardless of the data sources or agency operations.

### Real Value

We deliver **IEPD**-based data exchanges that enable **Integrated Justice Information Sharing** between state, local and regional justice partners.

## Real Experience

---

In New Jersey, our **Crossflo DataExchange®** platform supported one of the earliest inter-agency data-sharing initiatives across multiple levels and jurisdictions of government, while incorporating the Global Justice XML Data Model (GJXDM).

In Montana, Crossflo DataExchange® supports one of the first statewide, standards-based syndromic surveillance programs.

## People

---

**PDSG's** People – **JIEM** Certified Professionals available to review, validate and map Operational and Business requirements into Nationally recognized standards-based data exchanges.

Ensuring accurate, timely and comprehensive data sharing for:

- IJIS Identification
- Prosecution
- Adjudication
- Analysis
- Disposition and sentencing processes

Supporting advanced data sharing with JIEMs & NIEM based standards in use by:

- Records Management
- Justice information
- Case Management
- COTS application vendors

Reusable templates are scalable and easily modified to address diverse data exchanges.

## Crossflo DataExchange: for IJIS and CJIS Implementations

- Scalable
- Modifiable
- Standards Based

With Crossflo DataExchange, you can expand your integrated justice system, easily incorporating additional justice partners and agencies in later implementation phases.

### Delivers Maximum Interoperability

- Supports leading national data-sharing standards
- HL7, NIEM, GJXDM, EDXL, CAP

### Offers a Truly De-Centralized, Distributed Environment

- You manage and control your data
  - Data exchanges
  - Data governance
  - User permissions
- Data Sharing Artifacts including: Use Cases, Business and Data Models, Schemas, etc.

### CDX Architecture = Maximum Scalability

- Supports additional partners and additional exchanges
- Enterprise-ready
- Services Oriented

### Open and Portable Platform

- J2EE Framework

### Multi-query Type Capability

- Allows support for the push and pull of data
- Federated Queries as well as scheduled and triggered information exchanges

### Platform Pre-Configured for connections with:

- Oracle, Microsoft SQL Server, DB2, Sybase, Postgres, MySQL and other popular enterprise-class databases

### Multi-Level Security Model

- Only the correct data is shared with the right personnel under the correct conditions

## PDSG Enables Secure Information Sharing

Using Justice Exchange Standards
